## PROFILE

Final-year Software Engineering undergraduate (First Class, Years 1–2) with an HND in Business Management. As Batch Representative (APIIT & ESOF), bridges students and faculty, the same liaison role a PM plays between engineering, design, and business. Led cross-functional Agile delivery as Business Analyst and Scrum Master on a 3-sprint capstone, translating requirements into technical specs and coordinating UAT across 11 stakeholders. Applies data-driven decision-making (SPSS, PESTLE, McKinsey 7S) to product decisions, seeking a Product Management internship to build products end-to-end.

## KEY PROJECT EXPERIENCE

### Product Manager & Business Analyst - "BusLink" Smart Bus Reservation System

3-Sprint Agile Capstone Project, Staffordshire | 2025 – 2026 (First Class)

- Owned and prioritized the feature backlog, translating business requirements into technical specs and UI wireframes for the development team
- Directed cross-functional alignment across BA, QA, and development; orchestrated UAT with 11 users across 5 stakeholder groups
- Oversaw QA validation of 300+ test cases (99.65% pass rate) and reviewed security testing before final stakeholder presentation

### Market Entry & Globalisation Strategy - Lassana Flora (Singapore Expansion)

Individual Research Report, Pearson UK | 2026 (Distinction)

- Evaluated Singapore market entry viability for a domestic floriculture operation across 3 strategic dimensions using George Yip's Globalisation Drivers and PESTLE analysis
- Assessed cross-border readiness via McKinsey's 7S Framework and Hofstede's Cultural Dimensions, formulating a data-backed entry and risk-mitigation blueprint for supply chain, logistics, and regulatory dependencies

### Business Research Analyst - Softlogic Holdings PLC (Workforce Retention)

Research Project, Pearson UK | 2026 (Distinction)

- Conceptualized and executed an 8,900+ word quantitative study on the impact of corporate talent management practices on employee retention across 400 corporate respondents
- Ran SPSS-based Pearson correlation and Chi-Square hypothesis testing to isolate turnover variables, translating findings into actionable, data-justified retention strategies for a diversified conglomerate

## CORE SKILLS

- Product Management:** Market Analysis, Product Strategy, Product Roadmapping, Stakeholder Management, Sprint Planning & Execution
- Agile & Project Management:** Agile Methodologies, Scrum, Kanban
- Market & Business Analysis:** Market Research, Competitive Analysis, PESTLE, McKinsey 7S
- UX/UI & Product Design:** UX/UI Designing, Persona Creation, User Flows, Wireframing, Prototyping, Usability Testing, Figma, Draw.io
- Tools:** JIRA, Notion, Trello, SPSS, AI Tools (Claude, GitHub Copilot, ChatGPT, Gemini)
- Technical:** Directed AI-assisted full-stack development (Flutter, Laravel/PHP, MySQL, REST APIs); owned system design, requirements translation, and security testing (SQL Injection, XSS) across 4 academic builds, First Class

## EDUCATION

### BEng (Hons) Software Engineering (Reading)

Staffordshire | 2024 – 2027

### HND Business Management (Reading)

Pearson UK | 2024 – 2026

### Certification in General Psychology - Honours

American College of Higher Education | 2023
