PROFILE

Final-year Software Engineering undergraduate with First-Class academic performance in Years 1–2 and an HND in Business Management. Led a cross-functional Agile team as a Business Analyst and Scrum Master, translating stakeholder needs into clear technical requirements and coordinating UAT. Combines user-focused product logic with data-driven decision-making (SPSS, PESTLE) to bridge the gap between engineering, design, and business strategy, and is seeking a Product Management role.

EDUCATION

Staffordshire University <i>BEng (Hons) Software Engineering</i>	Reading 2024 – 2027
Pearson UK <i>HND Business Management</i>	Reading 2024 – 2026
Certification in General Psychology <i>American College of Higher Education</i>	Honours 2023
Certification in Media Presentation & Communications <i>Faizal Bongso Academy</i>	Certified 2023
Cambridge International Education <i>Cambridge O/L</i>	Sri Lanka 2023

KEY PROJECT EXPERIENCE

"BusLink" Smart Bus Reservation System <i>Product Manager & Business Analyst - 3-Sprint Agile Capstone Project</i>	Staffordshire 2025- 2026
- Led product discovery by surveying 102 respondents to define user personas and roadmap a long-distance transit platform. - Managed a 3-sprint Agile backlog, translating user pain points into technical specs and ERD schemas as Scrum Master/BA. - Prioritized high-impact features, securing the platform via Stripe integration and web penetration testing. - Bridged business and tech teams to drive automated QA testing, achieving zero critical bugs at deployment.	
Lassana Flora - Singapore Market Entry Strategy <i>Individual Research Report (Distinction)</i>	Pearson UK 2026
- Analyzed cross-border viability into Singapore for a LKR 1B enterprise using PESTLE and Yip's Globalisation Drivers. - Designed a digital B2B platform, localized ERP modules, and PayNow/GrabPay integration. - Formulated mitigation plans for biosecurity compliance, supply chain risks, and currency volatility.	
Softlogic Holdings PLC - Workforce Retention Study <i>Business Research Analyst (Distinction)</i>	Pearson UK 2026
- Led an 8,900+ word quantitative study on talent management practices and employee retention. - Modeled data from 400 respondents using SPSS to isolate key turnover variables. - Translated statistical insights into actionable corporate strategies to reduce voluntary employee turnover.	

CORE SKILLS

- Product Strategy:** Market Analysis, Product Roadmapping, Stakeholder Management, Competitive Analysis, PESTLE, McKinsey 7S, Prioritization Framework (MoSCoW), Go-to-Market Planning
- Execution & Delivery:** Agile/Scrum/Kanban, Sprint Planning, Backlog Management, User Story & PRD Writing, Cross-Functional Team Leadership
- UX/UI & Product Design:** User Research, Persona Development, Wireframing & Prototyping (Figma), Usability Testing, User Flows
- Data & Analytics:** SPSS, Quantitative Research (400+ respondent studies), Data-Driven Decision-Making
- Technical:** Led AI-assisted full-stack development (Flutter, Laravel/PHP, MySQL, REST APIs); owned system design, requirements translation, and security testing (SQL Injection, XSS) across 4 academic builds, First Class
- Tools:** JIRA, Notion, Trello, Draw.io, AI Tools (Claude, GitHub Copilot, ChatGPT, Gemini)
